

SQL SKILLS ASSESSMENT

12 Basic Tasks — employees · departments · salaries

Task 1: Remove Extra Spaces — TRIM

Some employee names have extra spaces at the start or end. Write a SELECT query to show all employees with their first_name and last_name cleaned up.

Task 2: Make Cities Uppercase — UPPER

Write a SELECT query to display all employee names and their city in UPPERCASE letters.

Task 3: Make Status Lowercase — LOWER

The status column has mixed values like 'ACTIVE' and 'Active'. Write a SELECT query to show all employee names with status in lowercase.

Task 4: Update Job Titles — UPDATE

Update all employees whose job_title is 'software engineer' and change it to 'Software Developer'.

Task 5: Rename a Column — RENAME

Rename the column basic_salary in the salaries table to base_salary.

Task 6: Add a New Column — ALTER

Add a new column called full_name (VARCHAR 150) to the employees table. Then update it to show the employee's first name and last name joined together.

Tables: employees · departments · salaries

SQL SKILLS ASSESSMENT

12 Basic Tasks — Continued

Task 7: Remove a Column — DROP

The `established_year` column in the `departments` table is not needed anymore. Write a query to delete it from the table.

Task 8: Rank Employees by Salary — RANK

Write a query to rank all employees from highest to lowest salary. Show `employee_id`, `basic_salary`, and their rank number.

Task 9: Find Missing Emails — NULL

Some employees do not have an email address. Write a query to find and display those employees.

Task 10: Find Duplicate Employees

Some employee records appear more than once in the `employees` table. Write a query to find which `employee_id` values are duplicated.

Task 11: Find Employees Whose First Name Starts With 'S'

Write a query to display all employees whose `first_name` begins with the letter S. Show their `employee_id`, `first_name`, `last_name`, and `city`.

Task 12: Find Employees Whose City Starts With 'D'

Write a query to display all employees who live in a city that starts with the letter D. Show their `employee_id`, `first_name`, `last_name`, and `city`.

Tables: `employees` · `departments` · `salaries`
